(1) Includes Quapaw district after 1921.

(2) Includes some re-milled old tailings, only small amount up to 1923, but reaching nearly 10 per cent of total milled in 1926.

(3) Includes 7,199,100 tons crude ore containing 0.93 per cent lead conc., 4.95 zinc conc., and 2,733,300 tons tailings containing 0.01 per cent lead conc., 1.75 per cent zinc conc.

(4) Includes 5,527,700 tons crude ore containing 0.87 per cent lead conc., 5.55 zinc conc., and 2,500,300 tons tailings containing 0.01 per cent lead conc., 1.53 per cent zinc conc.

(5) Includes 6,408,400 tons crude ore containing 0.79 per cent lead conc., and 5.31 per cent zinc conc., and 2,916,200 tons tailings containing 0.01 per cent lead conc., and 1.50 per cent zinc conc.

(6) Includes 4,118,600 tons crude ore containing 0.92 per cent lead conc., and 5.23 per cent zinc conc., and 3,095,000 tons old tailings containing 0.03 per cent lead conc., and 0.99 per cent zinc conc.
